## PANUNEE

### BORNEO, SANGALAKI, MARATUA – 7 DAYS/6 NIGHTS

DAYS	ITINERARY	DIVES
DAY 1	<b>Evening</b> : Check-in, boat orientation and crew introduction, light meal <b>07:00 pm</b> : Depart Tarakan port for diving safari.	
DAY 2	<b>Derawan area.</b> There are several diving terrains ranging from walls to caverns and fringing reefs. The island is also popular with green turtles that use it as a breeding ground laying their eggs in the night time. With 9 dive sites around Derawan, there are diversity of marine life, such as white tip, leopard and nurse sharks, cuttlefish, Spanish mackerel, jacks, batfish and ornamental reef fish in varied terrain, huge lavender seafans, cuttlefish, nudibranchs galore, unusual tube anemones, blue ribbon eels and multi colored crinoids. A completely new species of coral is also found here named appropriately Acropora Derawanensis. Derawan's 656ft jetty is home to dumpling squids, crocodile fish, finger-sized purple crayfish, squat lobsters, decorator crabs, sea horses and various species of worms, tunicates and Dwarf scorpionfish. Shallow (10 metres) reef at Sea Garden is very healthy coral and abundance of flatworms and nudibranchs, ribbon eels, large blennies and anemones.	
DAY 3	<b>Maratua area.</b> There are several impressive drop offs and a great drift dive can be done through the channel into the lagoon. The channel entrance is at 27 meters and strong currents sweep by attracting large pelagics such as eagle rays, mantas, barracuda, tuna, mackerel, hammerheads, and variety of sharks. It is the home of the barracudas. Best time to dive the channel is on an incoming or slack tide where marine life reaches a crescendo of activity. Coral growth is not as spectacular here due to the strong currents, diving should also be carefully planned.	
DAY 4	<b>Kakaban area &amp; Jelly Fish Lake.</b> The island of Kakaban is an isolated marine lake and unique in its own. Thousands of years ago the island was naturally uplifted and then isolate the marine ecosystem from surrounding marine area making all biota in this marine lake become very unique and endemic critters such as four species of non-stinging jellyfishes and non-stinging anemones. Marine biologists have also found a number of unknown species of anemones,	

	tunicates, flatworms and crustaceans in the lake. The shoreline is fringed with a tangle of mangroves. Their sturdy roots are carpeted with sponges, seaweeds and tunicates. Visibility is around 10- 12 meters and at its deepest point the lake is 18 meters with tidal amplitude of about 0.2m, this is a result of a network of underground fissures that connect to the ocean. This truly is a biological paradise where everything can easily be seen snorkelling.	
<b>DAY 5</b>	<b>Sangalaki area.</b> Sangalaki is known all over the world as the center of Manta Rays. Some of them are giant and gorgeous ray that have wing span up to 3 meters wide. To the east of the island are Manta Avenue, Manta Parade and Manta Run - where the manta rays can be found feeding, gills wide open, on a rich supply of plankton minutes from the beach. The mantas can sometimes be seen cruising down these manta highways, whilst other rays forage around for food under the sand together with the goatfish. Their wing tips break the surface at regular intervals as they circle around you. They prefer to swim close to the surface, so snorkeling or free diving is also a good way to interact with them.	
<b>DAY 6</b>	<b>Derawan Island area</b>	
<b>DAY 7</b>	<b>Morning :</b> Breakfast, check out and transfer to TRK Airport	
		<b>TOTAL DIVES</b>

## FAQ

### Visa and Passports

Passport holders of most western countries are required to obtain a visa on arrival which allows stays up to 30 days. Visa and Passport regulations for different countries are constantly in a state of flux. We always advise our guests that they check regularly for updates and changes. Please make sure that your passport has validity of at least 6 months upon arrival into Indonesia. You may be required to show a confirmed ticket to leave Indonesia within the maximum number of days you are allowed to stay in the country.

### Time Zone

The time varies depending on your location in Indonesia; GMT + 7 (West) in Sumatra, Java and Western Borneo; GMT + 8 (Central) in Sulawesi, Lesser Sunda Islands, Bali and Eastern Borneo; GMT + 9 (East) in Papua and Maluku.

### Health

Health services in Indonesia are by no means up to western standards, although there are hospitals in all major towns. We do advise all guests to ensure that vaccinations are up to date. We recommend that travelers follow normal precautions with food in order to prevent stomach upsets, and be sure to drink bottled water only. Please consult your doctor or nearest health authorities for up-to-date medical travel information well before departure.

### Language and Religion

The spoken language in Indonesia is Bahasa, however, nearly all Indonesians who work in the tourism industry speak English. 88% of all Indonesians are Muslims, and about 8% Christians. There are size-able minorities of Hindus and Buddhists who freely pursue their respective faiths.

### Climate and Weather

Indonesia is a tropical country, and the climate is fairly even all year round being roughly divided into two distinct seasons, 'wet' and 'dry'. The east monsoon, from June to September brings dry weather while the west monsoon, from December to March, brings rain. The transitional period between these two seasons alternates between gorgeous sun-filled days and occasional thunderstorms. Even in the midst of the wet season temperatures range from 21°C (70°F) to 33°C (90°F), except at higher altitudes which can be much cooler. The heaviest rainfalls are usually recorded in December and January. Average humidity is generally between 75% and 100%.

### **Clothing and Footwear**

Dress on board our yacht is very casual and most guests feel comfortable in little more than swim wear, shorts and t-shirts, particularly in the warm weather of Indonesia. A sweater is advised for cooler nights, particularly after multiple dives. Guests prefer bare feet on board the yacht; however island visits will require sturdy sandals or cross-trainers.

### **Electricity**

On board the yacht we have both 220V and 110V with 2 round pin sockets. (European style) Please make sure you bring universal adapter with you if necessary. On land 220/250 volts AC, 50Hz but 110 volts is still used in some areas. Plugs used are European-style with two circular metal pins.

### **Money Matters**

The local currency is the Indonesian Rupiah (IDR). The majority of established hotels, shops and restaurants accept major credit cards. However, smaller, family-run places probably will not. Worldwide Dive and Sail advises guests to exchange money prior to the departure of the trip and have small denominations of Indonesian Rupiah on hand

### **Airport Terminal Fee**

Passengers travelling within Indonesia are required to pay airport terminal fees. This varies from airport to airport; please ensure you have small denominations of local currency on hand to pay these fees.
